

The Opportunity for a New Humanity

The energy of your planet is changing and will facilitate a shift to a more gentle and peaceful time. This will only occur if it is the wishes of the inhabitants of your planet. We have sent many “new” people to the earth with an energy calibration that allows them to see the Light much easier than the inhabitants who have been on your planet for a long time. The “new” inhabitants, combined with the new energy on your planet could facilitate “The New Beginning” that We have spoken about. This will only happen when a tipping point is reached.

It is time to listen to the young ones, for they have much to teach you. Give voice to the young ones. They must be allowed to speak and be heard. As more and more of the inhabitants of your planet move to embrace the new energy vibration of peace, love, and compassion, then a great shift in your Earth will occur. Of course We cannot tell you what the shift will bring, we cannot even tell you if you can bring about that shift. For that, my friends, is totally up to you. We simply are here to support you and guide you, if you ask for our guidance. Know well that no matter what you choose for your planet and your Humanity We love you dearly as We have for all of time.

You are coming fast to the point in your time when a choice must be made. A fork in the road, so to speak. On one side is keeping the status quo, moving in the direction you have been moving for many eons. A slow evolution of doing more, consuming more, pushing more—always more. On the other path, if you choose it, is less. Less of everything you have been used to. Less people, less consumption, less pushing, less, less, less. The paradox of course, is that if you choose the path of less you will all receive more. Of course, few of you see or understand this yet, for your consciousness does not allow you to. But as more, or shall We say many, embrace the new energy vibration that has been sent to you, the possibility of comprehending that “less is more consciousness” will increase. As more and more comprehend that less and less is the way to salvation, then and only then will your planet shift to become what it was designed to be in the first place.

You see, free choice has provided a wonderful opportunity for Source to allow the Duality to choose its path. The Light and the Dark have existed for so many eons on your planet in an “experiment” to see what effect the Duality would have on the evolution of your civilization when given free choice. Of course, in order for the “experiment” to work, you had to forget Who You Truly Were when you incarnated into human life. You forgot your Divine Essence, so you could freely choose without undue influence of your Divinity, the Light or the Dark. For many, many eons humans have come to this place to play out their roles and to learn of life in the Duality. In the beginning you were programmed

to have very little connection with your Divinity, so We could witness the effect of the “Human factor.” Now that We have witnessed for many, many, many lifetime cycles the effect of a more pure Human influence It has been decided that the scales should be tipped by introducing more and more access to Divinity.

The question is, will mankind as it has been known accept this greater access to Divinity while in human form? And if it does, what effect will it have on Humanity as We know it? There is no right, there is no wrong. We simply wish to observe what will occur on your planet when greater access to Divinity is given.

For you see, everything in the Universe is always in a constant state of finding Balance—homeostasis. And by introducing greater access to Divinity, We wish to see what sort of “new balance” will be achieved on your planet. Of course, those playing out the roles of humans are simply Us. We are simply allowing Us to have more access to Us—or Who We Truly Are.

Again, please don't get Us wrong, what occurs in this part of the “experiment” (although that is a very poor word to describe this situation) does not really matter to Us in the bigger sense. It is only the Human condition that judges good and bad.
